

*Winner of AIA's National Healthcare Design Award in the category dedicated to built projects, more than \$25 million (construction cost)*

Sited on 84-acres in suburban Plano, Children's Medical Center Legacy was conceived as both a compliment to the main campus in Dallas, and as a community-based hospital to better serve suburban-based families.

Radial and spiral patterns of light and shadow are cast by the building's facade, creating a dynamic and colorful play of light and shadow. The building's design is a blend of traditional and modern architectural styles, featuring a mix of materials and textures. The overall effect is a striking and memorable architectural statement.

Most systems are shared with other functions such as the laboratory, patient rooms

Water is present throughout the site, and of the main, which is just outside through landscaped
