

Winner of AIA's National Healthcare Design Award in the category dedicated to the unbuilt projects.

The 56,000 square meters project includes three floors of out-patient clinics, retail and support spaces as well as three floors of parking garage space. Interior functions are arranged in layers with public circulation and waiting on the inside of the arc and transaction, clinic spaces and offices layered to the outside.

The site plan is a detailed architectural drawing showing the layout of the Seoul National University Hospital Medical Mall. It includes a north arrow and the text "SITE PLAN".

Seoul City and the city of Seoul. The rendering is a composite of several images, including a view of the city, a view of the hospital building, and a view of the interior. The text "INTERIOR PE" is visible in the bottom right corner of the rendering.
