and they can be used to create a sense of community and shared space. The design of the courtyard is a key element of the development's sustainability and social goals.

BIG's 8 House Mixed-Use development in Copenhagen. The image shows a modern interior hallway with a patterned carpet and a brightly lit yellow corridor.

Big 8 House is a mixed-use development in Copenhagen, Denmark, designed by BIG (Bjarke Ingels Group). The building features a prominent concrete structure and a warm, golden-brown color scheme. The interior is characterized by large, illuminated panels and a series of concrete columns and beams. The building is a prime example of modern architecture and sustainable design.

Publicly funded, BIG's 8 House is a mixed-use development in Copenhagen, Denmark. It features a mix of residential, commercial, and public spaces, all designed by the firm BIG.
