

3XN's proposal for the Dublin National Concert Hall is a sculptural showcase which creates a magnificent new home for music, while also providing a framework for the historical context upon which the new concert hall sits.

The new building provides a zone where the urban and park settings come together expressing their own symphony in addition to the music coming from within.

Dublin National Concert Hall is composed of three sculptural volumes, each of which contains its own unique Concert Hall. The three Halls are linked at the Grand Entrance through the historic Butler building and via a plinth; with the organic foyer promoting flow and social interaction between the three Halls.
