

Within the next few months, we will be featuring several houses from talented Argentinean architecture firm named BAK arquitectos. Most of these houses share the same geographical location, located in Mar Azul, a seaside town at 400km south of Buenos Aires, characterized by its large dune beach and his leafy coniferous forest. The architecture stems from the same concerns, focusing on a low budget, a reduced impact on the surrounding site, low maintenance houses with a short time of construction.
