

□

**Switch Building is a 7 storey apartment and art gallery building at 109 Norfolk Street in the Lower East Side, New York City.** □

The building consists of four floor-through apartments, a duplex penthouse, and a double height art gallery on the ground and cellar levels. nARCHITECTS provided full architectural services for the project, including all interior design.

The project's design emerges from a creative interpretation of some of the narrow constraints imposed by zoning and the developer's needs.
