

**Built over an existing construction, the new project has preserved in part the original metal structure of the first project. The current structure is larger and has absorbed the original garden of the first project.**

Italian architect Giovanni D'Ambrosio wanted to offer the visitors a space bursting with originality, something that would be unusual for a restaurant. The interior projects a feeling of being in 'an urban tropical forest' with metallic tubes laid out in a way that reproduces the complex organic distribution of tubular stems of bamboo.

even though they are not a part of the design, they are a part of the design and they are a part of the design.
