

We continue the series dedicated to the 2009 AIA Housing Awards with this great looking house from Ehrlich Architects.

According to the architect, the objective for this eco-friendly residence in Venice, California was to design a high-performance home that dissolves the barriers between indoors and outdoors; utilize raw, honest materials appropriate to the bohemian grittiness of the surrounding community; and have the smallest carbon footprint in balance with lifestyle.

The house design takes full advantage of the local climate such that a net zero energy building is obtained.

The interior design for this day house includes the following furnishings including the house and its outdoor space that

The image shows a modern architectural structure with a long, narrow pool of water. The pool is bordered by a dark metal frame and large, vertical panels of bright orange fabric or material. The structure is open on one side, revealing a view of trees and a building in the background. The sky is bright and clear.
