

**Located in South Park Seattle Washington, this project by Seattle based Pb Elemental Architecture was completed in May 2008. It includes 3 units total approximating 900 sq ft each.**

The long, thin site of 3720 sq ft consists of 3 homes – one singular home and one duplex in the rear of the site. With an emphasis on height, the homes are unique in design and space planning. □□ While the duplex homes have identical floor plans, the separate home (pictured here) is a tri-level home that differ in space and planning.

High resolution file 870 x 600 pixels, file size 500 kb, original size 85 x 50 pixels and

and the other is a large abstract painting of a face in blue and yellow. The room is bright and airy, with large windows and a high ceiling.
