

**Due to the building façade and structure complexity, the remodeling apartment design proposal is based on a logical existent elements union that, instead of hiding the chaos, creates spacious and illuminated areas with different perspective views in each one.**

This traces generated angulated views and, therefore independent spaces that do no need to be closed by walls or doors; these are the aspects that portrays the house at first sight.

Equipped with a system of air conditioning, the dining room is a perfect place for a meal. The red chairs and table provide a warm and inviting atmosphere.

The image shows a modern interior design for a living and dining area. The room features a large window with a view of trees, a round dining table with six chairs, a long low console table, a sofa, and a large potted plant. The floor is made of dark wood.
