

**Francis Parker School is San Diego's oldest and one of its largest independent day school. Back in In the fall of 2002, the school held a design competition for its Middle/Upper School campus aiming at the creation of a new Master Plan as well as the expansion of the existing facilities.**

Lake|Flato, won the competition with a design proposal that included "a unique blend of

sensitive environmental planning, inspirational public spaces and progressive, open buildings".

One of the recipients of the 2009 Educational Facility Design Awards, the campus recaptures the spirit of its original 1912 structure. The new classrooms, punctuated by operable walls, encourage connectivity to the environment to expose the process of education, not simply the products. High performance envelopes and environmental systems significantly reduce operating costs. The campus emphasizes vibrant, landscaped exterior spaces at its heart.
