

The Vitória Bay project is intended to help the region to evolve from its current state of inertia and initiate the dynamics that lead to the creation of a new identity and a new reference point for its citizens.

The Agenda 21 for Vitória is a city development strategy that foresees major changes in the infrastructure and a reformation of the waterfront. Apart from opening itself towards marine cruises and leisure tourism, there will also be an event center for multiple uses such as sports and cultural events, a marina for public use, shipyards and so on. This will obviously draw attention to the area even beyond the city limits. Tourism and events will attract new enterprises, create jobs and in the long run improve the Capixaba lifestyle.
